

Team meeting

10 JUNE 2020 / 12:00 PM

Attendees

Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. Client feedback
2. Planning
3. Final report

Notes

- We received positive feedback from the client after the pilot testing.
- The final report draft is almost finished.
- Finish writing what is left, do an overall check and submit the report by tonight.
- The improvements suggested by the client should be easy to implement.
- As we spent more time improving/testing the data collection application, the data dissemination app will not be as polished as data collection.
- There is not much to do for the server side regarding the data dissemination app as most parts overlap. (see issue board for particular features)
- There are a bit more things to do for the client side, but the UI will also be very similar.

Action Items

1. Add all the after-pilot improvements to the issue board
2. Finish data collection polishing
3. Have the basic features for client dissemination by the end of the sprint

Next Meeting Agenda

Today we have to submit the draft for the final report.

The next TA meeting is on 15/06. We will also have a meeting with the coach next week to receive feedback on the final report.
