

Team meeting

13 MAY 2020 / 11:00 AM

Attendees

Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. Analyse feedback received from the client regarding the application
2. Planning further steps

Notes

- Children should get a random video for the intervention (not every child should see the same video). For this we need to keep track of list of videos in the database in order to remember what video each child has seen.
- Take care of the “refresh logs you out” problem. Can hide URL from the application so it cannot be modified accidentally.
- Should be able to connect from multiple devices with the admin account so the test can be done on multiple laptops simultaneously. (collection part)

Action Items

1. Modify the backend and frontend to reflect client's requirements

Next Meeting Agenda

On 18/05 we will have the team meeting for sprint 1 review.

Next TA meeting is on 19/05.
