

Team meeting

8 JUNE 2020 / 12:00 PM

Attendees

Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. TA feedback
2. Week planning
3. Code structure
4. Final report draft

Notes

- During the meeting with the TA we have explained how the pilot went and what problems we had.
- More effort will be put on the collection app in order to have a fully functional application at the end. (already discussed with the client)
- The TA will give feedback on code based on:
 - folders (organized)
 - files (makes sense)
 - documentation
 - readme.md
 - methods size/structure
 - naming
 - understanding the code easy
- The TA said that the code looks good and there is no need for major refactoring.
- We should focus on development rather than refactoring as the code is already pretty clean, structured and documented.
- We have to finish the draft for the final report by Wednesday 10/06 (focus on this).
- Add an introduction for every chapter in final report draft.
- Take into consideration the feedback from Technical Writing.

Action Items

1. Start writing the final report draft
2. See what can be improved in the code
3. Start writing a good README.md

Next Meeting Agenda

The next TA meeting is on 15/06.
