Client meeting

20 MAY 2020 / 10:00

Attendees

Shirley de Wit, Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. IAT's Structure
2. Quiz format
3. Planning pilot testing at Nemo
4. Other questions

Notes

- Would be nice to have a queue admin board to see list with names and computer assignments.
- There are 4 test scenarios. All should be distributed equally (SocketIO state = scenario_name)
- What should happen if laptop breaks during the test? (put in the front of the queue if consent form table already contains kid's name?)
- All scenarios go to the next picture. Get feedback instantly if it's wrong. (do it as Harvard IAT does it)
- IATs contain only images. No words. Easier for kids.
- Should be able to remove the child data => make a delete transaction, store child name in the database to be easier to remove data
- Pilot in first weekend of june - choose 1 or 2 between us to go to AMS and send a confirmation mail to Shirley (half can go on Saturday, half on Sunday)

Action Items

1. Incorporate the feedback into the application
2. Finalize quiz struture
3. Implement the laptop management/test management
4. Send the link to collection-nemo when Shirley notifies us of her meeting

Next Meeting Agenda

On 25/05 we will have the next TA meeting and on 27/05 the next client meeting.
