Client meeting

02 JUNE 2020 / 17:00 PM

Attendees

Shirley de Wit, Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. Pilot preparations

Notes

- Explaining how the queue system works + demo
- Saving timestamp? Yes we do already.
- BIGGER signature for the consent form
- Parents can leave an email to have information send later
- Make https automatic for consent form
- Stable version running for pilot
- "raise your hand" screen (press next, enter NEMO) -> Add text box at the end of the collection test
- Put more effort into data collection during this period
- Admin can select which version of the test to load after logging in
- Low priority: implement traditional length for pilot. One thing we can do is to add a boolean is_traditional which picks some more categories -> basic hardcoded way to do it but easy to implement
- When kid classifies a question wrongly, show a dark blue 'X'
- Keep the number of (wrong) tries for questions
- There is an option not to answer for some questions (see document with details per question)
- Option to specify gender manually (text input)
- Open questions for EAT are low priority to implement
- Likert scale: 1-7 instead of 1-5
    - on the left: helemaal niet mee eens
    - on the right: helemaal mee eens

- Choose between the 3 types of tests + the length of the tests (reduced + traditional) after logging in
- 11 - 17 museum time
- On Saturday and Sunday at 10:30 - 15:00
- Someone may need to pick us up from the entrance
- Shirley will send us her phone number
- Money back for tickets
- Bring food!

Action Items

1. Create issues in gitlab according to the client requests for the Pilot.
2. Have the application ready for the Pilot.

Next Meeting Agenda

On 06/06 and 07/06 we have to go to the NEMO Museum in Amsterdam. (two groups)
