Team meeting

11 MAY 2020 / 12:00 AM

Attendees

Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. Analyze feedback received from TA
2. Discuss any problems that occured
3. See what tasks have to be finished before midterm meeting demo
4. Week planning

Notes

- Would be useful to add requests tested with Postman to a collection so that we can document what was tested and the frontend team can know what routes to use to access server.

- See what design patterns can be used in our application.

- Decide whether it is better to have a server that does everything or have separate servers for html pages and json data.

- Start testing the server. Search how to test Flask, find what libraries to use.

- Discuss how to store cookies and tokens from a securely.

Action Items

1. Create a collection of Postman requests for server
2. Start implementing tests for server side
3. Implement design patterns
4. Add tests and pylint check to CI pipeline
5. Set deadlines for our user stories to avoid falling behind with the development

Next Meeting Agenda

On 13/05 we will have the next meeting with the client.
