Team meeting

25 MAY 2020 / 12:00 PM

Attendees

Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. TA feedback
2. Solving Problems
3. Week Planning

Notes

- We received positive feedback from TA after the midterm meeting.
- Switching between development and TW tasks affect productivity.
- Prepare for the pilot before. Kids might ask questions that we do not expect. The applications should work without problems.
- Fixing a small problem with the sockets .
- Merging sockets branch and updating the issue board.
- Discussing how to store the quiz structure/format. How should we send information from server to client? How much should we hardcode and how much should we leave flexible and easily modifiable?
- Database schema needs refactoring as it is not really good for working with IAT questions.
- There is still a lot to be done this sprint. We have to work a bit harder.

Action Items

1. Make sure we finish all the remaining tasks for this sprint in time
2. Make a decision on data format and finish the implementation

Next Meeting Agenda

On 27/05 we will have the meeting with the client. Prepare questions.
