Team meeting

7 MAY 2020 / 15:00

Attendees

Andrei Geadau, Dragos Vecerdea, Alin Dondera, Alex Manolache, Ionut Constantinescu

Topics discussed

1. Implement first connection between client and server
2. Deploy the server
3. Send form data to server for processing

Notes

- Dragos and Andrei finished the functionality of client-form
- The user is able to input its data (name and name of children) and send it to server for processing
- Alin, Ionut and Alex successfully deployed the server on Heroku service
- Created Postgres database
- Created first POST route
- Saved dummy data to that databasegit
- We successfully fixed the CORS error (the server was unable to detect that the client side was a registered application and treated it as malware/ bot)
- Dragos and Andrei improved the maintainability of the code

Next Meeting Agenda

On 11/05 we will have the next meeting with TA
